SUMMARY

Fullstack Javascript web developer experienced in building RESTful APIs and modern user interfaces. Seeking a role in a highly collaborative team environment that focuses on best practices of automated testing, and automated CI/CD pipelines

SKILLS

Frontend experience: JavaScript, React, Angular, Vue, HTML, CSS, SASS

Backend experience: NodeJS, Typescript, Java Spring, SQL, Docker, AWS, Bash, Splunk

AWS Technologies used: Lambda, SQS, SNS, S3, RDS

PROFESSIONAL EXPERIENCE

Software Developer - Finastra. Denver, CO (1/22-9/23)

- Built new login page using React to serve as template for dozens of client companies
- Created new API to funnel dynamic configuration between banking microservices that reduced server timeouts from previous API at 1% to below .1% (**Node, Javascript**)
- Worked on call over weeks to monitor and reboot unperformant servers (**Cloudflare, Bash**)
- Onboarded new developers by helping them get database replicas and set up local servers with docker

Fullstack Developer (contract) - The Pros Closet. Denver, CO (7/21-1/22)

- Created custom bike intake software to shorten mechanic processing times by 10% (**React, Node**)
- Contributed to backend services that communicated between Shopify store, product inventory database, and SQL database (**SNS, SQS, SQL, Node**)
- Designed product display and marketing pages (**Shopify, React**)

Fullstack Developer (contract) - Lockheed Martin Enterprise Operations. Denver, CO (1/21-7/21)

- Created an internal application that captured and displayed software technologies used across teams which was adopted company wide (**Angular, Java Spring Boot, Spring Data JPA, MySQL**)
- Implemented frontend and backend tests and worked with continuous integration process (**Cypress, JUnit, Jasmine, Gitlab CI**)

Fullstack Developer (contract) - CenturyLink. Denver, CO (05/2020 - 12/2020)

- Built responsive shopping cart to help customers to view current internet speeds and upgrade options (**VueJS, Typescript, Vuex, HTML, CSS, Splunk**)
- Developed Node API to aggregate customer info from a variety of backend services (**Node, Redis**)

Software Developer - Techtonic. Boulder, CO (09/2018 - 05/2020)

- Participated in Web Development training certified by the Department of Labor
- Developed a cross-platform iOS and Android app for an international waterpark company (**JavaScript, React Native, Redux, MySQL, HTML, CSS**)

Software Developer - RM3 Labs. Boulder, CO (08/2018 - 09/2018)

- Built Lab Information Management System to automate lab reporting (**Basic, Labware LIMS**)
- Crafted lab report templates using SAP software outputting to Excel databases. (**Excel**)
- Wrote technical software documentation for chemists and biologists

CERTIFICATIONS

- AWS Certified Developer Associate, 2019

EDUCATION

University of Colorado Boulder. 9/2016 - 5/2018

- Non Degree seeking master's classes in information systems for development (**Javascript, Python**)

University of Arizona. 09/2011 - 5/2015

- B.S. in Neuroscience with an Emphasis in Learning and Memory GPA: 3.78
- Coursework in Computer Science (**Javascript, Python**)
